

# Epinephrine

Drug:

EACH mL CONTAINS:

Epinephrine	1 mg
Sodium chloride	9 mg
Sodium Metabisulfite	1 mg
Chlorobutanol (preservative)	5 mg
Water For Injection	q.s.

Uses:

Epinephrine is a powerful, quick-acting vasoconstrictor for emergency use only in the treatment of anaphylactic shock.

The symptoms of anaphylactoid shock include glassy eyes, increased salivation, grinding of the teeth, rapid breathing, muscular tremors, staggering gait, and collapse with death following. These symptoms may appear shortly after injection of a bacterin, vaccine, or antibiotic.

Dosage:

Administer 1 mL per 100lbs of body weight

Frequency:

Once

Route:

This drug is labeled for Intramuscular (IM) injection.

Duration:

As directed

Withhold:

Milk 0 Days

Meat 0 Days
